

# How to Monitor Your Refrigerator Temperature

- Record the current, maximum and minimum temperatures twice daily in the *Temperature Log Book*.
- Always reset the maximum-minimum thermometer after temperature recordings and keep the in/out switch in the out position.
- Call your **public health unit** immediately when vaccines have been exposed to temperatures below +2°C and/or above +8°C.

**Public health unit:** \_\_\_\_\_

See the *Vaccine Storage and Handling Guidelines* for additional information.
