

Outbreak Alert

We currently have an outbreak and need your help to stop the spread of germs.

You should **NOT** visit if you are coughing, sneezing, have a fever, cold, diarrhea or vomiting.

We thank you for your cooperation!

We recommend you:

- delay your visit so you don't catch and spread germs
- clean your hands with alcohol-based hand rub every time you:
 - ▶ arrive
 - ▶ leave
 - ▶ cough, sneeze, or blow your nose
- see only one resident per visit. If you visit more than one, please check in with the nursing station.

North Bay Parry Sound District
Health Unit

An outbreak means . . .

there are more people than usual that have colds, flu or stomach bugs in the last 48 hours at our facility, all with the same symptoms. Outbreaks are caused by bacteria, viruses or parasites.
