Multisystem Inflammatory Syndrome in Children

Information on this syndrome and how it is connected with COVID-19 is still emerging. These symptoms are associated with MIS-C.

Has your child been in close contact with someone who has symptoms or tested positive for COVID-19, in the past 14 days?

Has your child returned from travel outside Canada in the past 14 days?

If you have answered YES to any of these do not go to school. Self-isolate right away. Testing for COVID-19 is recommended.

Call 911 if you are experiencing any of the following symptoms:

- Severe difficulty breathing (struggling for each breath, can only speak in single words)
- Severe chest pain (constant tightness or crushing sensation)
- Feeling confused or unsure of where you are
- Losing consciousness
