

# How to Use Drugs Safely During Covid-19

**Having enough harm reduction supplies** on hand will reduce sharing and reusing.

**Using with a friend** will help reduce the risk of fatal overdose.

**Health care providers are here for you.** They can help you plan for involuntary withdrawal and connect you with services that meet your needs.

**Putting drug wraps or baggies in the mouth, vagina or anus can spread germs.** Avoid this where possible or clean wraps and baggies before inserting.

**Safe disposal of drug use equipment** can reduce accidental injury and the spread of infections and germs.

Recognizing the signs and symptoms of an overdose. **Pick up a naloxone kit today so you can help save a life.**

**Washing your hands, cleaning surfaces and preparing your own drugs** will help protect against the spread of germs.
